1. Introduction

1.1 CHIS 2015 Adult Survey Data File

The 2015 California Health Interview Survey (CHIS 2015) Adult Data File consists of individual records obtained from the 2015 data collection period of the CHIS 2015-2016 Adult survey.

The UCLA-Center for Health Policy Research (UCLA-CHPR) is responsible for maintaining consistent standards to protect respondent confidentiality as specified in approved protocols by the UCLA IRB (IRB# 11-000068) and the California Committee for the Protection of Human Subjects (00-04-04). Organizations that receive CHIS data are required to complete a data use agreement with UCLA-CHPR. The data files listed below must be maintained in accordance with the provisions of the data use agreement between the California Department of Public Health (CDPH) and UCLA-CHPR. In order to protect respondent confidentiality, UCLA-CHPR maintains the most confidential and sensitive CHIS data only in its files at the Data Access Center (DAC) located at UCLA-CHPR. Researcher access to confidential data, including respondent latitude and longitude, is available by application to the DAC. For more information, please contact dacchpr@ucla.edu. Limited technical assistance is also available from CHIS – please send email to chis@ucla.edu.

1.2 Accompanying Files

In addition to the data file are several accompanying files that facilitate use of the data file; some are not necessary for data analysis but add convenience in utilizing the main data.

- a. Data file: ADULT.SAS7BDAT, ADULT.SAV, ADULT.DTA
- **b. Proc format file:** ADULT PROC FORMAT.SAS
- c. Format file: ADULT_FORMAT.SAS
- d. Label file: ADULT LABEL.SAS
- e. Imputation flag file: ADULTF.SAS7BDAT, ADULTF.SAV, ADULTF.DTA
- f. Others: ADULT.XPT, ADULTF.XPT

2. What's New in CHIS 2015

This document describes new and notable design features and data collected in CHIS 2015. CHIS data users should review the information below and our detailed online documentation before analyzing or reporting CHIS data. Please visit the following page for more documentation on CHIS methods: http://healthpolicy.ucla.edu/chis/design/Pages/methodology.aspx

Data Collection Timeline

CHIS 2015 data were collected between May 2015 and February 2016. Like past CHIS data collection, CHIS 2015 data were collected as part of a two-year cycle (2015-2016). This document describes changes pertaining to the first year of that two-year cycle.

From CHIS 2011 forward, single-year data are available representing a yearly cross-section of California's population. Relative to the larger, two-year CHIS data files available prior to 2011, small populations (such as child, teen, or some racial/ethnic groups) or rare conditions and characteristics will have fewer observations in the single-year data file. In such cases, pooling two or more single-year data sets may be required to achieve sufficient sample size and statistical stability. Users who need more information about pooling or trending data over time should review the *Analyze CHIS Data* website at http://healthpolicy.ucla.edu/chis/analyze/Pages/default.aspx or go to the *Analyze CHIS Data* user forum at http://healthpolicy.ucla.edu/forum/Pages/Forum.aspx.

What's New and Notable in 2015?

- 1) New and Updated Survey Questions Survey questions are added, removed, and modified in each two-year cycle of CHIS to meet stakeholders' needs and monitor emerging public health concerns. Questions are removed from the interview to reduce its length and save data collection costs when topics are no longer relevant for public health surveillance, or when they are not funded by a sponsor. Most CHIS questions remain in the interview across CHIS cycles. For CHIS 2015 approximately 90% of the content continued from CHIS 2014. Occasionally, we make changes to question wording based on methodological evaluations or when user feedback strongly suggests that changes will produce better data. Otherwise, we keep questions consistent across years to aid in trending. Reinstated questions were asked in cycles prior to 2013-2014, and again in 2015. Noteworthy additions to CHIS 2015-2016 include:
 - a. New adult interview questions
 - i. Discrimination experiences in the health care setting
 - ii. Use of telemedical care
 - iii. Birth control method currently used among women 18-44 years old
 - iv. Reinstated questions: mammography exams, current birth control use, and pregnancy status

- b. New child and teen interview questions
 - i. Child questionnaire: delay in dental care and parental awareness of First 5 California "Talk, Read, Sing" program

- ii. Teen questionnaire: psychological distress in the past year
- 2) Measuring Medi-Cal Eligibility in CHIS CHIS continues to approximate the population of uninsured individuals below 65 years qualifying for Medi-Cal coverage. CHIS 2014 released a modified measure that incorporated the changes to Medicaid eligibility in California due to the Affordable Care Act. As before, the CHIS 2015 eligibility measure uses modified adjusted gross income rules to determine income eligibility. Respondents who qualify for Medi-Cal eligibility due to medical need only (SSI-eligible, blind, or with disabilities) remain subject to asset testing. New questions in CHIS 2015 probe further into assets reported, including the value of assets and ownership of secondary vehicles and property, in order to estimate Medi-Cal eligibility. Detailed documentation about the MAGI variable is available here: http://healthpolicy.ucla.edu/forum/Documents/ELGMAGI3%20-%20Measuring%20MAGI%20and%20Medi-Cal%20Eligibility%20in%20CHIS.pdf
- 3) Detailed Health Insurance Measure: New to 2015, CHIS is releasing a detailed insurance type variable (INS9TP) that provides more granular information for the population covered by employer-based insurance (whether alone or in combination with Medicare or Medicaid). This variable will allow users to evaluate trends in dual-coverage or develop their own insurance type hierarchy.
- 4) Increased Cell Phone Sample CHIS 2015-2016 doubled the fraction of interviews from cell phones to address the potential coverage error in random digit dial (RDD) telephone sampling that arises from an increasing fraction of the general population only being accessible by cell phone. In CHIS 2015, 9,727 adult interviews (46.2% of adult interviews) were conducted from the cell sample. In CHIS 2013-2014, 7,752 adult interviews were conducted from the cell phone sample (19.3%). For more about cell phone sampling from the American Association for Public Opinion Research see http://www.aapor.org/Cell Phone Task Force Report.htm.
- 5) Responsive and Adaptive Design (RAD) As the result of a competitive bidding process, RTI International conducted the CHIS 2015-2016 data collection under contract with the UCLA Center for Health Policy Research. RTI International incorporated a two-phase sample, and responsive and adaptive data collection design in CHIS 2015. This was employed to reduce the risk of nonresponse bias by changing the follow-up procedures to nonrespondents toward the end of each quarterly sample release.
- 6) Race and Ethnicity Coding In CHIS, all respondents are asked whether they would describe themselves as Native Hawaiian, Other Pacific Islander, American Indian, Alaska Native, Asian, Black, African American, or White. Hispanic or Latino respondents who reported American Indian or Alaska Native (AIAN) as their race, but did not report a tribal affiliation, are now recorded as having AIAN racial identity in the data, increasing the sample of "any-mention" AIAN respondents in CHIS 2015. In prior cycles Hispanic or

Latino respondents with unknown AIAN tribal identities were generally reclassified as non-AIAN.

File: adult.sas7bdat

7) Oversamples – CHIS 2015 continued to oversample Korean and Vietnamese Americans as has been done in previous cycles since CHIS 2001. As with CHIS 2014, Keiro Foundation supported a Japanese oversample in CHIS 2015. With additional funds from Marin County Health and Human Services, CHIS 2015 also oversampled Marin County.

3. How to Use the Data Dictionary

This Data Dictionary describes the variables in the CHIS 2015 data file. The index of the data dictionary lists variables first in alphabetical order and then in the order they were administered in the survey questionnaire. Please note that identical variable names appearing in the CHIS 2001, CHIS 2003, CHIS 2005, CHIS 2007, CHIS 2009, CHIS 2011-12, and CHIS 2013-2014 data files does <u>not</u> guarantee identical question wording, response categories or universe; please consult the questionnaires and data dictionaries to assess comparability across cycles. A printable version of the questionnaire can be found on the California Health Interview Survey web site at

http://healthpolicy.ucla.edu/chis/design/Pages/questionnairesEnglish.aspx.

The data dictionary contains the following fields:

- **VARNAME:** The names of the variables.
- QNAME15: The names of the 2015-2016 survey items. A blank/NA field means the variable is constructed with survey items shown in the INPUT VAR field.
- **QNAME14:** The names of 2013-2014 survey items identical or similar to the 2015-2016 items.
- QNAME11: The names of 2011-2012 survey items identical or similar to the 2015-2016 items.
- **LABEL:** A description (or label) of the variable which is the same as what is included in the label file described in Section 1.2.
- **VALUE:** Response categories and their sample distributions of categorical variables. The following negative values are used for all variables:
- -1: INAPPLICABLE.
- **-2:** PROXY SKIPPED.
- -5: CHILD/HOUSEHOLD INFORMATION NOT COLLECTED FOR TEEN AND CHILD INTERVIEWS.
- -7: REFUSED.
- -8: DON'T KNOW.
- **-9:** NOT ASCERTAINED.
- **MEAN STATISTICS:** Sample distributions of continuous variables.
- **UNIVERSE:** The scope of eligible respondents for the corresponding item. For some questions and variables, certain respondents become ineligible due to skip patterns or other restrictions (e.g., age and sex).
- **INPUT VAR:** Source variables used to construct the one in the **VARNAME** field.
- **NOTES**: Additional information about the variable.

4. Sample Code for Analysis and Pooling of CHIS data

As previously noted, sample code to assist with analyses and pooling of CHIS data is available on the CHIS website at http://healthpolicy.ucla.edu/chis/analyze/Pages/default.aspx

C. Restricted Variables

The following geographic variables are not located in the funder files, but may be accessible upon request and IRB approval (UCLA & CPHS). These variables are restricted due to their identifiable nature.

VARIABLE	LABEL	NOTE
LATITUDE	LATITUDE	GEOGRAPHIC LONGITUDE OF RESIDENCE. USED FOR MAPPING.
LONGIT	LONGITUDE	GEOGRAPHIC LONGITUDE OF RESIDENCE. USED FOR MAPPING.
	CENSUS BLOCK	SMALLEST CENSUS DELINEATION AVAILABLE TO MERGE WITH
	INCLUDING	CENSUS DATA; USED FOR MULTILEVEL MODELING,
CBLK	CENSUS TRACT	NEIGHBORHOOD ANALYSIS.

Teen and child restricted variables

VARIABLE	LABEL	NOTE
	SCHOOL CENSUS	
	TRACT	SMALLEST CENSUS DELINEATION AVAILABLE TO MERGE WITH
	INCLUDING	CENSUS DATA; USED FOR MULTILEVEL MODELING, SCHOOL
SCH_BLK	BLOCK	NEIGHBORHOOD ANALYSIS.
	STATE SCHOOL	
SCH_CDS	ID NUMBER	
	SCHOOL	
SCH LAT	LATITUDE	GEOGRAPHIC LONGITUDE OF SCHOOL. USED FOR MAPPING.
	SCHOOL	
SCH LON	LONGITUDE	GEOGRAPHIC LONGITUDE OF SCHOOL. USED FOR MAPPING.
